Dear Prof. Farooq,

This is about '**GTC Registration & Attendance Awards program - NVIDIA GTC | March 18-21, 2024**' run by RP-Tech, to encourage participation and attendance for NVIDIA GTC. While you have not qualified for any award, as you have not met the program deliverables, based on our discussion with NVIDIA, we are pleased to confirm as a special case, the award of NVIDIA Jetson Developer Kit for the establishment of an Embedded AI lab in the Institute. This award is also in anticipation of the continued support of your institute for the NVIDIA developer program and GTC.

We are here to confirm an award to the institution with **4 no of NVIDIA® Jetson Nano™ Developer Kit, 1 no of NVIDIA® Jetson Orion Developer Kit**

To take forward the dispatch of the award, we request you to confirm your acceptance of the award by reply by email confirming your acceptance. We would also need you to attach a copy of the institute PAN card along with your confirmation, as under the introduction of Sec 194R effective July 1, 2022, NVIDIA Graphics needs to report any giveaways to the tax authorities and hence the Institute PAN is needed to submit TDS for the invoice value. The TDS (currently @10%) will be borne by NVIDIA and they will gross up the same for reporting to the tax authorities. The approximate invoice value (Invoice for warranty & Transit purposes only) of your award is **INR 116208.76**. You may want to check with the Institute Finance/Tax team tax consultant further on any impact on your Income tax compliances.

For now, we request you to kindly revert with the institute PAN details/copy and your confirmation by email of award acknowledgment, so that we can initiate the shipment of the award to you and further intimate NVIDIA to close the TDS payout.

Thanking you,
GTC Team
