A one Day Program on “IEEE v Tools Vision 2026”

Date : 25/03/2026

Organizing by : SREC IEEE Student Branch STB17901 and
IEEE Computer Society SBC17901B In Association
with IEEE Power Electronics Society SBC17901C and
Department of CSE

No of Students Attended : 17

The SREC IEEE Student Branch organized a **One Day Program on “IEEE v Tools Vision 2026”** on **25th March 2026** at the **Lecture Hall**. The event was conducted by **SREC IEEE Student Branch STB17901** and the IEEE Computer Society Student Branch Chapter (SBC17901B) in association with the IEEE Power Electronics Society Student Branch Chapter (SBC17901C) & Department of CSE.

The primary objective of this program was to create awareness among undergraduate students about IEEE vTools and its importance in efficiently managing IEEE activities. The session focused on encouraging students to utilize vTools for organizing events, maintaining records, and improving their technical, organizational, and leadership skills. It aimed to provide students with practical exposure to digital tools that simplify IEEE operations and enhance productivity.

During the program, the organizers introduced students to IEEE vTools, a suite of online tools designed to support event management, reporting, and collaboration within IEEE. Students were informed about various modules such as vTools Events, vTools Reporting (L31), vTools Officers, and Elections, which help in creating events, managing participant data, submitting reports, and maintaining leadership information. The session also included a demonstration on how to use these tools effectively for conducting and documenting IEEE activities.

The importance of using IEEE vTools for maintaining transparency, accuracy, and proper documentation was highlighted. Students were encouraged to actively use these tools while organizing workshops, seminars, and technical events. The role of vTools in aligning student branch activities with IEEE standards and global practices was also explained, emphasizing its significance in professional development.

The program received a positive response from Advisors & students, and many participants showed interest in learning and using IEEE vTools for future events. It successfully motivated students to adopt digital tools for efficient event management and active participation in IEEE activities.

The program concluded with an interactive session where Advisors & students clarified their doubts regarding the usage of vTools, event creation, and reporting procedures. Overall, the session was informative and practical, helping students understand how IEEE vTools can play a vital role in enhancing their technical and managerial capabilities.
